

NUMBER OF LICENSEES BY JURISDICTION—2014

Each year, NCEES surveys its member licensing boards for the number of engineering and surveying licensees in their jurisdiction. Below are the number of engineers and surveyors per jurisdiction in 2014 as reported by the individual boards. Licensees who are licensed in multiple states are included in the numbers for each jurisdiction where they are licensed. Some states track the numbers of state resident licensees vs. out-of-state licensees; those are reported as resident and nonresident in the charts below.

	Engineers		Surveyors		Engineers and Surveyors (dual licensees)	
	Resident	Nonresident	Resident	Nonresident	Resident	Nonresident
AK	2,489	2,664	363	115	not tracked
