NCEES honors Texas professional engineer Anne Bertelsmann for service

Anne Bertelsmann, Ph.D., P.E., of League City, Texas, has been awarded the NCEES Distinguished Examination Service Award for her dedicated service to NCEES and the engineering profession. Bertelsmann was recognized during the organization's 102nd annual meeting in Boston, Massachusetts, on August 17, 2023.

As an NCEES exam development volunteer since 2001, Bertelsmann has demonstrated a continued commitment to NCEES and its advancement of engineering licensure. In 2001, she joined the Principles and Practice of Engineering (PE) Chemical Exam Development Committee and began serving in a leadership role in 2008. She has continued to serve in a variety of leadership roles for the past 15 years.

Bertelsmann has served as the editor of the *PE Chemical Reference Handbook* since 2017. She is a constant advocate for and contributor to improvements that strengthen the handbook. During the 2018 transition of the PE Chemical exam from pencil-and-paper to computer-based testing, Bertelsmann was an influential leader and instrumental in transitioning the item bank to the ExamDeveloper software. She is also a vocal advocate for diversity among committee membership.

Bertelsmann works in a process safety role within the refining organization of Marathon Petroleum Company LP. She lives with her family in the Houston area.

ABOUT NCEES

The National Council of Examiners for Engineering and Surveying is a nonprofit organization made up of engineering and surveying licensing boards from all U.S. states, the District of Columbia, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Since its founding in 1920, NCEES has been committed to advancing licensure for engineers and surveyors in order to safeguard the health, safety, and welfare of the U.S. public.

NCEES helps its member licensing boards carry out their duties to regulate the professions of engineering and surveying. It develops best-practice models for state licensure laws and regulations and promotes uniformity among the states. It develops and administers the exams used for engineering and surveying licensure throughout the country. It also provides services to help licensed engineers and surveyors practice their professions in other U.S. states and territories. For more information, please visit ncees.org.
