NCEES honors Wyoming professional engineer Raymond Jacquot for service

Raymond Jacquot, Ph.D., P.E., of Laramie, Wyoming, has been awarded the NCEES Distinguished Examination Service Award for his dedicated service to NCEES and the engineering profession. Jacquot was recognized August 16, 2024, during the organization's 103rd annual meeting in Chicago, Illinois.

Jacquot contributed to the development of the FE exam for 25 years, beginning in 1990. During this time, he served terms as chair and vice chair of the FE Electrical and Computer subcommittee.

Jacquot was part of an exciting time in NCEES history when in 1995, the Council approved adding discipline-specific modules to the FE exam. In 1996, he was integral in the development of the FE Electrical and Computer exam and assisted in the transition.

After earning his bachelor's and master's degrees from the University of Wyoming and earning his doctoral degree from Purdue University, he went on to develop areas of expertise in vibration and structural dynamics, control, simulation, and animation of dynamic systems. In 2007, Jacquot was recognized as the Wyoming Engineering Society Outstanding Engineer for his long and dedicated service to the engineering profession, society, and people of Wyoming.

Avocationally, Jacquot is a former rock climber and mountaineer who later became interested in the exploration of canyons on the Colorado Plateau of Utah. In retirement, he has become a landscape painter of the scenes that he visited as a mountaineer and canyon explorer.

ABOUT NCEES

The National Council of Examiners for Engineering and Surveying is a nonprofit organization made up of engineering and surveying licensing boards from all U.S. states, the District of Columbia, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Since its founding in 1920, NCEES has been committed to advancing licensure for engineers and surveyors in order to safeguard the health, safety, and welfare of the U.S. public.

NCEES helps its member licensing boards carry out their duties to regulate the professions of engineering and surveying. It develops best-practice models for state licensure laws and regulations and promotes uniformity among the states. It develops and administers the exams used for engineering and surveying licensure throughout the country. It also provides services to help licensed engineers and surveyors practice their professions in other U.S. states and territories. For more information, please visit ncees.org.
