NCEES offers ethics course on moral literacy for professional engineers and surveyors

NCEES has launched a second ethics training course for professional engineers and surveyors. The Moral Literacy for Professional Engineers and Surveyors course provides ethics training designed to meet continuing education requirements. The comprehensive online module provides a foundational understanding of moral literacy, equips learners with resources to support ethical decision-making, and offers opportunities to apply these concepts through practical exercises.

Key topics include
- An overview of moral literacy and its core components
- Models and frameworks for ethical decision-making
- Resources to help guide ethical decision-making
- Common impediments and barriers

Through video instruction, practical exercises, and interactive activities, participants will explore the concept of moral literacy and learn how to apply models and frameworks for ethical decision-making in professional practice. The course is self-paced online learning that includes five segments featuring instructional video and interactive activities and is worth two hours of continuing education credit upon successful completion of 80 percent or higher on the final quiz. Course details and a completion certificate will be automatically loaded into the NCEES continuing professional competency (CPC) tracking service.

For more information and to access the Moral Literacy for Professional Engineers and Surveyors course, create or log in to your MyNCEES account at ncees.org.

ABOUT NCEES

The National Council of Examiners for Engineering and Surveying is a nonprofit organization made up of engineering and surveying licensing boards from all U.S. states, the District of Columbia, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Since its founding in 1920, NCEES has been committed to advancing licensure for engineers and surveyors in order to safeguard the health, safety, and welfare of the U.S. public.

NCEES helps its member licensing boards carry out their duties to regulate the professions of engineering and surveying. It develops best-practice models for state licensure laws and regulations and promotes uniformity among the states. It develops and administers the exams used for engineering and surveying licensure throughout the country. It also provides services to help licensed engineers and surveyors practice their professions in other U.S. states and territories. For more information, please visit ncees.org.
