NCEES seeks volunteers for Fundamentals of Engineering exam content review

NCEES is currently seeking engineering professionals to participate in a content review for the Fundamentals of Engineering (FE) exam. The results of this survey will be used to update the specifications for the exam, which is typically the first step in the process leading to professional engineering licensure.

NCEES requires a cross section of professionals—including licensed professional engineers and academics teaching engineering courses—from all engineering disciplines to complete an online survey about the fundamental knowledge and skills necessary for a recent engineering graduate to work in a manner that safeguards the health, safety, and welfare of the public. The survey can be completed in 20–30 minutes.

“These studies help NCEES ensure its licensing exams remain relevant to current professional practice,” explained Director of Exam Services Tim Miller, P.E. “The value of this content review depends on the number of people who participate, so NCEES is eager to get input from as many engineering professionals as possible.”

The survey is open at ncees.org/FEcontentreview until August 20, 2018. For more information, email FEcontentreview@ncees.org.

ABOUT NCEES

The National Council of Examiners for Engineering and Surveying is a nonprofit organization made up of engineering and surveying licensing boards from all U.S. states, the District of Columbia, Guam, the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands. Since its founding in 1920, NCEES has been committed to advancing licensure for engineers and surveyors in order to safeguard the health, safety, and welfare of the U.S. public.

NCEES helps its member licensing boards carry out their duties to regulate the professions of engineering and surveying. It develops best-practice models for state licensure laws and regulations and promotes uniformity among the states. It develops and administers the exams used for engineering and surveying licensure throughout the country. It also provides services to help licensed engineers and surveyors practice their professions in other U.S. states and territories. For more information, please visit ncees.org.
